

Automobile Parts Mould - Plastic Injection Mould

Automobile Parts Mould

Automobile parts mould includes: bumper mould, dashboard mould, lamp mould, Auto door and Auto carpet.

Information:

Material: P20 made in china

Life: over 500000 times

Cost: 100000-650000RMB, Specific price is determined by products' structure and the demand of customs

Molding cycle : within 60-90 days after payment in advance

1. Major equipment: CNC machining centre, numerical control milling machine, linear cutting machine, drilling machine, grinding machine, flying cutter
2. Process capability: the development and design of products, mold design, mould making and injection molding processing, 10sets(100-200pairs)/mouth
3. Name: Automobile parts mould(bumper mould, dashboard mould, auto lamp mould, and so on)
4. Manufacturing lead time: 30-90days
5. Materials: cavity, core P20, hardness>40hrc ,molding board, mould feet45#
6. Temperature control system: hot runner, keeping constant temperature
7. Cooling: circulation
8. Post treatment: nitrogen hardening

Automobile Parts Mould:

1. Automobile parts mould can work in with other parts precisely and product surface is smooth.
2. long life, corrosion resistance, ageing resistance ;
3. Automobile parts mould can undertake various GRP products processing with customer's materials
