

Dashboard Mould - Plastic Injection Mould

[Dashboard Mould](#)

Dashboard Mould

Dalai Plastic Mould Company specializes in designing and producing of various kinds of automobile plastic mold. We have our own CNC processing centre and a full set of injection mold product fabrication equipment. We have established firm footing both in domestic dashboard mould markets and abroad due to our superb technology, stable quality and all-around service.

1. Major equipment: CNC machining centre, milling machine, linear cutting machine, drilling machine, grinding machine, EDM machine tool, injection molding machine and so on.
2. Process capability: the development and designing of products, mold design, mould making and injection molding processing, 10sets(100-200pairs)/month
3. Name: Auto Dashboard Mould
4. Manufacturing lead time: 30-90days
5. Materials: cavity, core P20, hardness>40hrc , molding board, mould foot 45#
6. Temperature control system: hot runner
7. Cooling: circulation
8. Post treatment: Nitrogen hardening
