

Household Appliance Mould & Products - Plastic Injection Mould

Household Appliance Mould & Products

Household Appliance Mould

1. Major equipment: CNC machining centre, numerical control milling machine, linear cutting machine, drilling machine, grinding machine and flying cutter.
2. Process capability: the development and designing of products, mold design, , mould making and injection molding processing 10sets(100 - 200pairs)/ month
3. Name: Air conditioner mould/ washing machine mould
4. Manufacturing lead time: 30-90days
5. Materials: cavity, core P20, hardness>40hrc, molding board, mould feet 45#
6. Temperature control system: hot runner, keeping constant temperature
7. Cooling: circulation
8. Post treatment : nitrogen hardening

Dalai plastic mold produces a large range of washing machine mold and air conditioner mould which have the following features: smooth surface, stainless mould, without burr, corrosion resistance, ageing resistance, long life performance and undertaking various GRP products processing with customer's materials
