

## Industrial Goods Mould - Plastic Injection Mould

### Industrial Goods Mould

1. Major equipment: CNC machining centre, numerical control milling machine, EDM machine tool, linear cutting machine, drilling machine, grinding machine and flying cutter.
2. Process capability: the development and designing of products, mold design, mould making and injection molding processing, 10sets(50-100pairs)/ month
3. Name: Industrial Goods Mould
4. Manufacturing lead time: 30-60days
5. Materials: cavity, core P20, hardness >40hrc , molding board, mould feet 45#
6. Temperature control system: hot runner, keeping constant temperature
7. Cooling: Circulation
8. Post treatment: Nitrogen hardening

Category: Multifunction fan mould, garbage bin mould, diving glasses/mask mould, tray mould and so on.

Industrial goods mould has the following features: high-strength, smooth surface, corrosion resistance, ageing resistance, undertaking various GRP products processing with customer's materials
